Great Year Round Service & Supply !

Six styles of gillnet fit into these categories:

See our Website for colors

www.seamar.com

1) Monotwist Gillnet

Made of various numbers of fibers all of a #1.5 size 0.20 mm diameter. Standard Strength

The sizes are as follows:

- MT #26 _____ (#1.5 x 6 strands)
- MT #29 _____ (#1.5 x 7 strands)
- MT #33 _____ (#1.5 x 8 strands)
- MT #43 _____ (#1.5 x 9 strands)
- MT #50 _____ (#1.5 x 10 strands)
- MT #63 _____ (#1.5 x 12 strands)
- MT #73 _____ (#1.5 x 14 strands)
- MT #83 _____ (#1.5 x 16 strands)
- MT #93 _____ (#1.5 x 18 strands)
- MT #123 _____ (#1.5 x 24 strands)

SALMON GILLNETTING

We supply the Momoi brand of gillnetting, but can special order others.

We supply gear for all major commercial fisheries in Alaska including Bristol Bay, False Pass, Port Moller, Sand Point, Cook Inlet, Prince William Sound, and Southeast Alaska. Of course, we stock the most popular sizes and colors for each of the areas.

Gillnetting is also available for Washington, Oregon, and California and any fisheries. Any gillnetting can be special ordered from the factory with a minimum of 90 days for delivery. The following styles are available:

Alaska Legal Salmon Gillnetting:

- Supertwist (MST) - 10-12% stronger than Monotwist
- Monotwist
- Alaska 6 Style, 6 Strand
- MA-6 Super 6 Strand

Herring Web:

- Single Strand Monofilament: Legal only for herring in the State of Alaska, as well as salmon in Cook Inlet!

State of Alaska law requires that gillnetting used for salmon must contain at least six filaments, each of which must be at least #1.5 in diameter - equivalent to 0.20mm.

Setnetters: Special Order

Nets can be ordered with Guard Mesh on a special order basis. This puts heavier web on the top and bottom right where most of the abuse occurs.

No Stock # for this service - Special Order.

Paneled Nets: Special Order

You can order your web with different color "panels" manufactured into it.

Note - Some sizes are limited to a double-knot, but the majority of the sizes are available in MOMOI's patented No-Slip triple knot. Any color may be ordered from the **MOMOI color chart** for any type of gillnet. Shades produced by other manufacturers may also be ordered.

Sample cards & price quotations are available on request.

See our Website for colors: www.seamar.com

2) MST Gillnet

Same construction as Monotwist, but uses M1-Super nylon for added strength.

The sizes are as follows:

- MST #26 _____ (#1.5 x 6 strands)
- MST #29 _____ (#1.5 x 7 strands)
- MST #33 _____ (#1.5 x 8 strands)
- MST #43 _____ (#1.5 x 9 strands)
- MST #50 _____ (#1.5 x 10 strands)
- MST #63 _____ (#1.5 x 12 strands)
- MST #73 _____ (#1.5 x 14 strands)

3) Alaska 6

AK-6 style consists of a constant strand count of six strands with the diameter of the individual strands increasing for additional strength.

The sizes are as follows:

- AK-6 #29 _____ (#1.75 x 6 strands)
- AK-6 #33 _____ (#2.00 x 6 strands)
- AK-6 #43 _____ (#2.25 x 6 strands)
- AK-6 #50 _____ (#2.50 x 6 strands)
- AK-6 #63 _____ (#3.00 x 6 strands)
- AK-6 #73 _____ (#3.50 x 6 strands)

4) MA 6

The same strength as MST, but in 6-strand construction. It is 10-12% stronger than AK-6 through the use of M-1 Super Nylon.

The sizes are as follows:

- MA-6 #29 _____ (#1.75 x 6 strands)
- MA-6 #33 _____ (#2.00 x 6 strands)
- MA-6 #43 _____ (#2.25 x 6 strands)
- MA-6 #50 _____ (#2.50 x 6 strands)
- MA-6 #63 _____ (#3.00 x 6 strands)
- MA-6 #73 _____ (#3.50 x 6 strands)

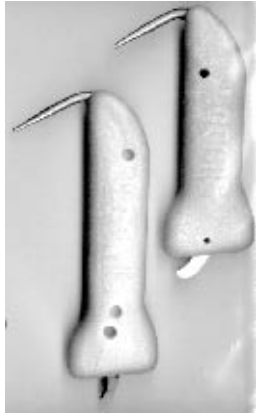

5) Single Strand Monofilament

Available in all sizes for herring, salmon, bait fish, etc.

5) M1 Monofilament

Same construction as monofilament, but made with M-1 Super nylon.

Loomis Fish Pick

Plastic construction.

Stock #	Description
LPCFP001	Short Handle, Long Hook, Ring Knife Blade
LPCFP002	Long Handle, Long Hook, Rng Knife Blade

Fish Pick

Herring - Gillnet Corkline

Code: #537

Braided polyolefin cover over a parallel polyolefin fiber core.

Characteristics:

- Low stretch
- Firm balanced construction.
- Good strength to weight ratio
- Class: Non Spliceable.
- Floating line with specific gravity of .90

Use: Gillnet lead corklines & corklines.

Stock #	Diameter	WEIGHT Lb Per/ 100 Ft.	Length FATHOM
SAM53701055	3/8"	2.3 Lb.	55 Fm.
SAM53701110	3/8"	2.8 Lb.	110 Fm.

Rivermaster - Gillnet Leadline

Code: 596

Composite braided cover of spun & continuous filament fiber, over a notched-segmented core.

- Low break strength & good hanging qualities.
- Cover has a black longitudinal hanging line.

Characteristics:

- Excellent abrasion characteristics.
- Weak cover yarns designed to break, so gillnet is saved when snagged up.
- Firm construction and knot holding.
- Use: Gillnet lead - River or deep water fishing.

High Performance Dura Pacific Gillnet Corkline

Code: #533 Soft / 534 Medium / 535 Firm

Combo braided cover of Polyolefin & spun nylon with a parallel polyester core. Cover has black longitudinal hanging line.

- Corkline with 3 times strength needed for hard-towing situations.
- Fathom.55 & 110.

Characteristics:

- High strength - low elongation - long life.
- Durable cover for excellent knot adhesion.
- Great working strength, good abrasion resistance.
- Net position stays put, deploys well off drum.
- Great to lash floats & anchor netting.
- Non Spliceable. Specific Gravity: 1.2

Use for corklines. Seine leadline if external leads are used.

Gillnetting

OceanMaster / Dura - Gillnet Leadline

Code: 489

Braided combo cover of polyolefin & spun nylon, over a flexible notched-segmented leadcore.

•Cover has a black longitudinal hanging line.

Characteristics:

- Excellent strength, flexible, easy to handle.
- Good surface yarns on cover to lash netting.
- Non-spliceable.

Use for Gillnet lead - oceans, rivers, & lakes.
